MURSALEEN SHAH

FULL STACK WEB DEVELOPER

+91 7780967523 | shahmursalin9@gmail.com | https://github.com/MursaleenShah |
https://www.linkedin.com/in/mursaleen-shah/

CAREER SUMMARY:

Motivated engineering graduate equipped with comprehensive skills in full-stack development. Aiming to leverage technical proficiency and innovative mindset to contribute effectively to dynamic projects and drive impactful solutions in the ever-evolving tech industry.

EDUCATION

2019 - 2023 | MODEL INSTITUTE OF ENGINEERING & TECHNOLOGY

Bachelor of Engineering - Computer Science

RELEVANT PROJECTS

REAL ESTATE (BUY/SELL) WEB APPLICATION

- This project is a comprehensive Real Estate application built using the MERN (MongoDB, Express.js, React, Node.js) stack. The app features advanced authentication through JWT, Firebase, and Google OAuth for secure and seamless user access. Users can perform Create, Read, Update, and Delete operations for property listings using MongoDB.
- The application includes user-friendly features like image uploads, property listing management, and more, aiming to enhance the user experience. Moreover, it incorporates advanced search functionality, allowing users to efficiently find properties based on their preferences.
- Project Link:- https://mern-estate-v1a1.onrender.com

YOUTUBE CLONE USING REACT.JS

- This project is a YouTube clone developed with React.js and styled using Material-UI components. It leverages the Rapid API to fetch and display YouTube data, providing users with a visually appealing and responsive interface for browsing and watching videos, with features such as video playback, search functionality, and more.

COUNTERFEIT PRODUCT IDENTIFICATION USING AI

- Counterfeit shoes are a major problem affecting consumers, businesses, and the industry. They can be dangerous for consumers and harm businesses' reputations, leading to legal issues. With the rise of e-commerce, the sale of counterfeit shoes has become more prevalent. Solutions like TrueKicks can help prevent the sale of counterfeit shoes and protect consumers and businesses.

AUTHENTICATION APP

- This web application provides a robust authentication system, enabling users to securely register, log in, and share secrets. Leveraging Passport.js, the app supports both local authentication and seamless login through Google OAuth 2.0. MongoDB is employed as the database to store user information, while sessions are managed using Express sessions
- The application features a dynamic and interactive environment allowing authenticated users to submit their secrets..

INTERNSHIPS

CODEFUEL INC

Web Developer | 01 July, 2022 - 31 August, 2022

- Design, build efficient, reusable and reliable ReactJS, HTML, CSS code
- Collaborate with other developers to update the website and create new features.
- Increase productivity by using software to organize, track bug patches and add feature requests.

CODE QUOTIENT

Junior Developer | 01 Feb, 2022 - 31 April, 2022

- Developed some basic projects like Todo app, Discussion Platform, compiling code using API's, Worked with node.js, Request to Server, Login authentication and developed frontend of an ecommerce website.

SKILLS

- C/C++
- HTML/CSS/JavaScript
- jQuery
- React.js
- Node.js/Express.js
- REST APIs
- Data Structures & Algorithms
- AWS Cloud
- Git/Github

CERTIFICATIONS

- Data Mining - NPTEL
- Cloud Computing - NPTEL
- Technology consulting virtual internship- Deloitte
- Blockchain - Coursera
